Selina Teece Pwerl – new works

As the interest in Selina's work has been so great since we launched her Spinifex Story and Bush Tomato paintings last July and, due to the many enquiries at our Desert Stories show last month, we felt her work warranted a newsletter circulation of its own.

Selina is from the Utopia region and although she has been painting for some time it is only this year she has begun to paint seriously and develop her own distinct design and style. Selina is 31 years of age and has two young children. She is very dedicated to her artistic career and we are delighted to be involved in that.
